GENERAL INFORMATION

We have again harvested a wonderful crop of plump, clean bulbs. Bulblets are plentiful of most varieties.

You will note from this list that we are mainly interested in good cut flower varieties. Each year we test new ones but only about one out of ten show promise of replacing those we have been growing, consequently these new varieties are used as extras or sold at greatly reduced prices.

We do exhibit at several of the leading shows each year and manage to take many ribbons.

ORDERING. Use the enclosed order form. By giving us the information requested it helps us to fill your order properly.

PRICES. We do not solicit orders under \$2.00. All orders for \$5.00 or over will be shipped prepaid. We are more generous with extras on CASH orders. No C.O.D. orders will be accepted unless accompanied with at least a 25% deposit. (Minimum deposit \$1.00)
6 bulbs at dozen rate.

BULB SIZES. Large size (L) 1-3/4" and over. Medium size (M) 3/4" - 1-1/4". Small size (S) 3/4" and under.

Large and medium size bulbs will bloom the first year planted as will small bulbs of some varieties. Bulblets usually require two years of good growing weather to produce flowering size bulbs.

SHIPMENTS. We usually start shipping soon after March 1st, depending upon weather conditions. Express shipments are safest so be sure and note your express office on the order blank. Due to the high express rates we will ship by parcel post whenever possible.

OUR GUARANTEE. We guarantee our bulbs to be free of disease and true to name. Open and examine shipments immediately upon arrival. If unsatisfactory notify us at once. Due to conditions beyond our control we cannot guarantee growth or production. At no time will we be responsible for more than the original amount of order.

COLOR CLASSIFICATION. The number directly under the variety name indicates the color class that the variety should be entered in at all major shows. The first numeral in the classification number also indicates the approximate size of the individual florets.

UPON RECEIPT of bulbs open package to admit air and store in a cool, dry place until planting time.

CAUTION. Bulbs are treated with D.D.T. dust.

GLADIOLUS CULTURE. Complete instructions for planting, growing and storage of bulbs will be included with each order.

The following descriptions are the result of our tests and show observation of several Recent Introductions. (Year of introduction noted following variety name). It takes a really promising variety to rate our listing.

The older varieties described are among the best. They are rated as to color, beauty and performance in the field and as to their ability to open in water.

Small Size Bulbs. We are not listing small bulbs of many varieties as we prefer to reserve them for planting stock. If interested in small sizes send us your wants and, if stock permits, we will quote prices.

	Salmons Glory	

GARDEN LABELS

After several years of testing different types of garden labels we have selected the WHITE CAP as the most satisfactory.

This marker is made up of a white zinc name plate that is crimped over a sturdy wire frame.

The overall length of the marker is 9" and it is easily stuck into the ground.

The zinc name plate takes pencil marks easily and the lettering remains legible for years.

Name plate can be removed and stored with bulbs for variety identification.

Prices Prepaid, Complete -- 60¢ per doz.
\$1.00 per 20
\$3.50 per 100

With each order for 100 labels we will include a waterproof pencil free of charge.
